- No Fillers or Binders

What is *Saccharomyces boulardii*?

S. boulardii is a beneficial probiotic that works quickly in the digestive tract to help re-establish a balanced intestinal environment and promote gastrointestinal and immune health.* Its natural antimicrobial properties help protect against diarrhea-causing bacteria in the intestines and provide effective natural support for those suffering from *Clostridium difficile* (commonly known as *C. diff*) and *E. coli* infection.* *S. boulardii* has also been shown to help reduce the side effects of treatment for *H. pylori*, a bacterial infection linked to inflammation of the stomach lining and peptic ulcers.*

BoulardiiMAX is an advanced gastrointestinal support probiotic with 10 billion active cultures of *S. boulardii*. Just one capsule per day of BoulardiiMAX provides a therapeutic dose of high-potency probiotic support for those suffering from occasional as well as chronic diarrhea resulting from illness, antibiotic use, parasites, food sensitivity and other contributing factors.*

Who Can Benefit from BoulardiiMAX?

BoulardiiMAX is recommended for those who are currently taking or have just completed a course of antibiotics and want to replenish beneficial intestinal flora as well as help prevent antibiotic-induced diarrhea.* It may also help prevent inflammation caused by intestinal bowel disorders and has been shown effective in managing symptoms of IBS, dyspepsia, and bowel irregularity.* Frequent travelers, as well as those concerned about increased intestinal permeability (i.e. Leaky Gut Syndrome), may also benefit from using BoulardiiMAX.*

BoulardiiMAX was formulated by Brenda Watson, C.N.C., president of Advanced Naturals and the founder of natural healthcare clinics specializing in digestive care.
